POTATO WARMER

CODE	MODEL	SERIE
CR0856219	6NSP/E400	SERIE 600

GENERAL FEATURES

A line of compact cooking appliances, designed for people who do not want to give up on high performance, even in small spaces. Made of AISI 304 18/10 stainless steel, elegantly finished with Scotch Brite satin finish, it has rounded edges and capacious recessed areas; it is 600/650 mm deep and has a modular width of 400/600/700/800/1000 mm; the series comes complete with open base supports, with cupboards or refrigerated bases. The appliances can be easily put together to build a unit, that is compact, without any gaps thanks to a covering profile that guarantees protection against leaks and therefore excellent hygiene. High flues, ergonomic knobs mounted on a sloped control panel for better visibility, make this range easy to use from the very first time. All models are CE-approved.

TECHNICAL DETAILS

ELECTRIC CHIP SCUTTLES - TOP VERSION

The potato warmer is suitable to contain a GN 1/1 H. 150 mm tray that is kept at the right temperature thanks to the combination of a lower heating element and a ceramic infrared heater, with independent switches. The temperature can be adjusted from 30-90°C. The perforated false bottom makes it easier to remove the contents as well as drip any excess oil.
